

RIIOHS202A: ENTER AND WORK IN CONFINED SPACES (Refresher)

Brief Outline of training:

This refresher course is available for previously trained confined space personnel whose 18 month - 2 year certification is due to expire. This course will provide the participant with confined spaces skills enhancement.

Enter and work in confined spaces is designed to provide the participants with the competencies required to remove or minimise risks in the workplace associated with confined spaces. This course provides participants with specific knowledge & skills to participate in the process of hazard identification, risk assessment and control related to confined spaces. This course is made up of 2 national Units of competency RIIOHS201A: Work safely and follow OHS policies and procedures and RIIOHS202A: Enter and work in confined spaces

These units are from RII09 Resources and Infrastructure Industry Training Package which is a consolidation of:

- Civil Construction Training Packages (BCC03 & RII06)
- Coal Mining Training Package (MNC04)
- Extractive Industries Training Package (MNQ03)
- Drilling Training Package (DRT03)
- Metalliferous Mining Training Package (MNM05)

This course is delivered in accordance with (AS2865 - 2009 Safe Work in Confined Spaces) OHS Regulation 2001 and Australian Standards for Registered Training Organizations.

Who should attend this course:

All persons who work in confined spaces. (The definition of a confined space can be – a non habitable place with restricted entry and exit's, reduced head space, oxygen enrich or deficient atmosphere). Persons who are undertaking work associated with confined space entry including standby duties, rescue & first aid, those who are monitoring and / or maintaining equipment associated with confined space entry.

Pre- / Co-requisites:

A full Confined Space course must have been attained within a 2 year time frame.

Assessment:

Assessment will consist of a written 20 questions activity with multiple answer question format plus, a practical assessment covering the use of equipment and a physical attitude test in confined space simulator.

Important Information:

The practical assessment portion of this course is physically demanding and requires actual work practices to be performed. Please advise if you may have difficulties with
